-  313 Ruffin Dr, Sardis, MS, 38666

## SKILLS

- Accepting constructive feedback
- Working with superiors
- Peer-mentoring
- Fast-learner
- Self-guided

## TECHNOLOGY

- C++
- Python
- HTML/CSS
- Django

## EDUCATION

### Base Camp Coding Academy Graduate Institute

SEP 2022 - SEP 2023

A non-profit organization with the vision of creating fast-paced, professional and group-oriented individuals who are self-motivated and have a resolve to solve problems with elegance and efficiency.

## PROFILE

I am an inspiring software developer with years of experience and dedicated practice to several different technologies. I am currently enrolled at Base Camp Coding Academy Graduate Institute in Water Valley, MS, which is a non-profit organization geared towards creating work-ready individuals with exceptional hard-programming experience and trained professionalism that includes project management, self-evaluations and becoming experienced and familiar with the latest-used web-based, full-stack technologies.

At Base Camp Coding Academy Graduate Institute, I have gained proficiency in Python, HTML/CSS, and Django Framework. By my graduation, I will have become proficient in Java, Javascript, and Spring.

I not only have exceptional technical skills and experience, I also have developed outstanding leadership skills through taking on leadership roles during projects and accepting positions as a peer-mentor in our volunteer-based Mentoring and Tutoring Leadership Team at Base Camp Coding Academy Graduate Institute.

My greatest soft skills are:

- Decision-making
- Stress-management (both for self and for peers)
- Problem Solving
- Excellent communication and genuineness when discussing projects with peers and colleagues.

## COMMUNITY OUTREACH

### Mentoring and Tutoring Leadership Team

Base Camp Coding Academy Graduate Institute

2022-2023

A volunteer-based leadership team at Base Camp Coding Academy with the goal of providing excellent tutoring to our peers and accounting for weak-spots that are visible in the curriculum.

- Schedule and run lectures on the current material, providing vital details about the behaviors of specific languages and how they interact
- Provide class-wide discussions on current material, roll-back discussions for students who are running behind and providing example projects for the class to work on
- Maintain consistent communication with Technical and Professional directors and instructors for the program, provide constructive feedback and receive advice and feedback on how to make the team reach its goals
- Provide one-on-one tutoring for students who are running behind, keeping up with the goal of having all students share the same understanding of the technology used

## WORK EXPERIENCE

### Server

Volta Taverna, Oxford, MS

2018-Present

- Keep up positive communication with guests
- Help customers navigate digital systems
- Fast-paced and self-guided workflow
- Point-of-Sales system usage
- Keeping a clean environment for guests
- Teamwork involving assisting coworkers with their own workflow, taking on extra tasks to ensure that the business is running smoothly each day
- Having strong impressions on all guests to ensure the increase of regular customers
